

ACMF

HEAT PUMP COVERS

LOUVRED ALUMINIUM COVERS FOR HEAT PUMP OUTDOOR UNITS

Hide the unit. Keep the airflow.

Aerofoil louvres screen the outdoor unit from view while air moves through the front and both sides. The back stays open to the wall for airflow, and the cover detaches for full service access. Four standard sizes, powder coated in nine standard colours, sold fully assembled or as a flat pack at 25% off. Flat packs need only a screwdriver; ACMF supplies the fixings and an installation manual.
