# EQUITONE [ linea ]

EQUITONE [linea] is a unique 3D shaped, through-coloured facade material that plays with light and shadow. EQUITONE [linea] displays a linear texture that highlights the raw inner texture of the core fibre cement material. Every moment of the day, the changing angle of the daylight gives the facade material a different aspect. The material comes in a large panel size and can be transformed into any size or shape in the workshop or on site. No matter what design options you explore, EQUITONE's through-coloured nature guarantees crisp, monolithic details. Both visible and invisible fixing options exist for EQUITONE [linea].

Available in 3 colours (See material sampler)
