

10 facts about Aluminium

6

1

Long life time

Choosing aluminium is a choice for life. Aluminium profiles will remain beautiful for years and years. They are not affected by UV rays or moisture, do not corrode or rot.

2

Maintenance friendly

The surface treatments of aluminium are extremely durable and therefore the profiles should never be varnished or painted. It is sufficient to clean the aluminium surfaces several times a year with lukewarm water and non-aggressive soap.

3

Optimal acoustic insulation

Combined with acoustical glass, aluminium solutions are designed to guarantee optimum sound insulation.

4

Environmentally friendly and ecologically responsible

Aluminium is 100% recyclable. The recycling of aluminium takes a minimum of energy, without loss of quality.

5

Thermal insulation

Aluminium solutions from Reynaers Aluminium are designed with excellent thermal insulation. An aluminium window insulates well against both the cold and the heat and meets all regulations for energy efficiency.

6

Safe and better fire protection

Aluminium is very strong and non-flammable. Therefore it is resistant to burglary and provides fire protection.

7

Lightweight

Aluminium is an ultra-light material. At the same time, the material is very robust to realise complex structures.

8

Numerous colours and styles

Aluminium profiles can be anodized or painted in more than 400 RAL colours and different finishes. Whether it is a functional, renaissance or minimalist building, the Reynaers Aluminium solutions are available in different styles, suited for every type of home.

9

Professional placement

The computer controlled machining of the profiles and the precise assembly of the finished product enable a smooth and flawless installation of aluminium windows and doors.

10

Large window dimensions

Aluminium makes it possible to realise very large windows, offering wide views outside.
