Soudaseal FR & Reynaers CS-77P

To whom it might concern,

The Soudaseal FR, as a exterior sealant for the Reynaers CS-77P Windows and Doors Systems is an acceptable product to use for the sealing of the Gorilla FR Expanding Foam (Soudafoam FR HY) between the structure and the frame.

The Soudaseal FR has been tested to meet the requirements under various scenarios in alignment with NZBC AS1530.4:2014.

Soudaseal FR also meets the requirements for a weathertight sealant that can withstand New Zealand weather and UV environmental conditions and will adhere, with correct surface preparation as per the Technical Data Sheet information to both building substrates and the Reynaers CS-77P window and door systems.

Regards

Steve Loveridge
